

tailored solutions for the
modern office.

lookbook & specification guide:
FLEX_Office, desking and workstations

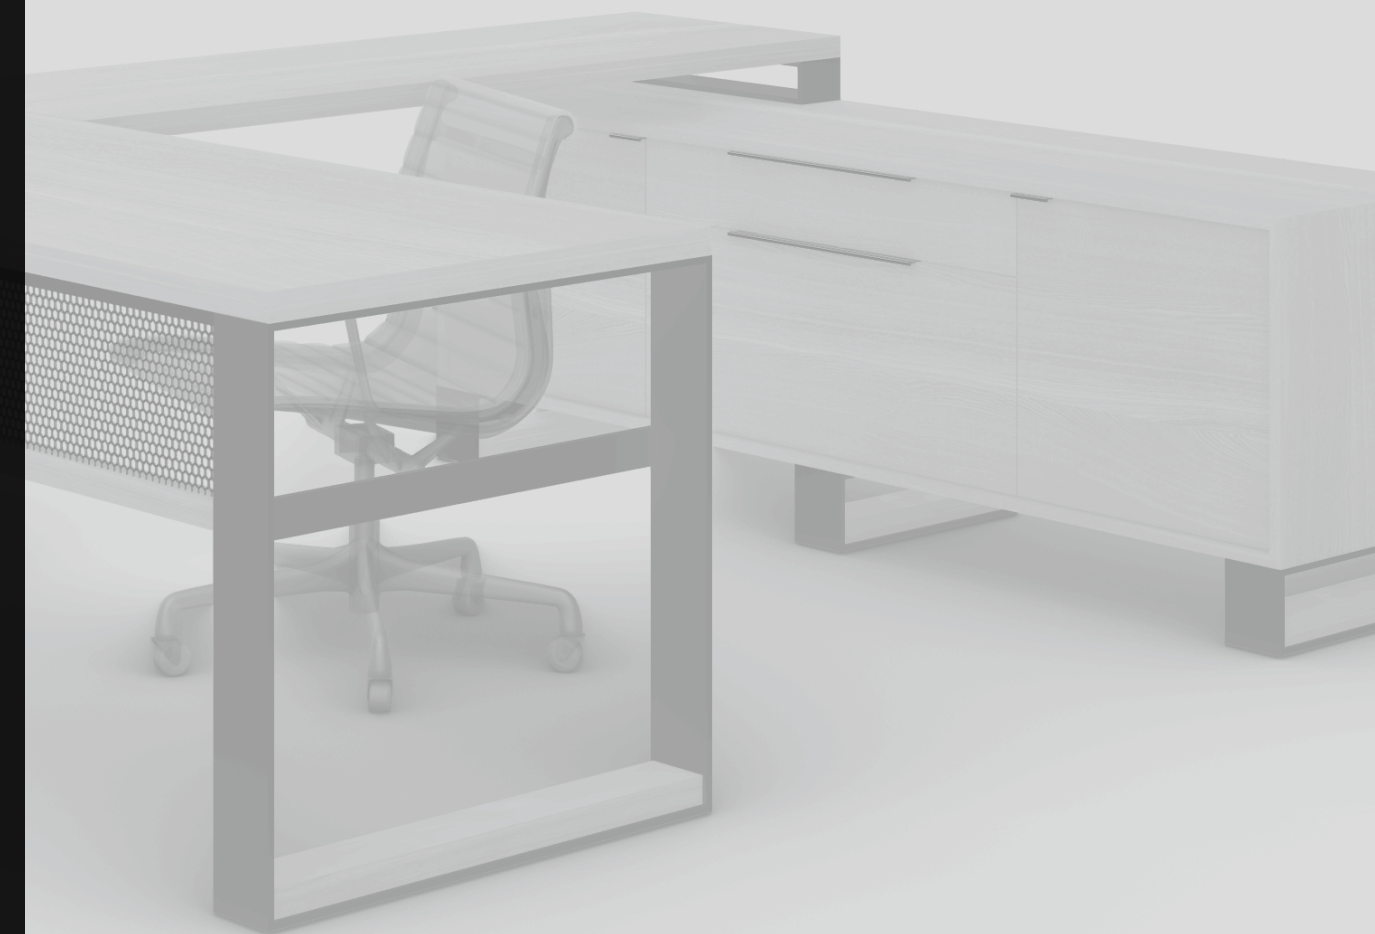

FLEX_Office

by Skram

FLEX is a premium workspace system by North Carolina-based Skram. The range –100% made in N.C.– consists of desking, benching, storage, accessories, as well as conferencing and collaboration options. Natural materials, restrained design, fully-integrated connectivity and wire management, all with Skram workmanship. FLEX is a solution for design-driven projects requiring refinement, performance, and flexibility.

This document is a limited overview of basic elements for desking and private office, and does not include benching and conferencing options. It is intended as an introduction. . .a starting point.

FLEX is fully customizable in material, scale, and configuration to suit. Please contact your SKRAM representative to configure.

FLEX_Office

Main Desk

Standard Dimensions: 72w x 30d x 30h.

The Main Desk is the primary building block of the FX system. The unit can function solo, chained, or with Return or Return + Credenza, as shown on the following pages.
